

ALBS BILL FORM

IOWA BOYS STATE CLEAN WATER ACT

AN ACT TO: Implement Iowa's recently enacted "Farm to Faucet" water quality laws, furthering the protection and clean-up of Iowa's streams, waterways, and ground water, by authorizing the DNR to establish and impose fines on any of Iowa's "factory farms" which discharge excess nitrates into Iowa's water system.

WHEREAS: On June 1, 2026, Iowa Governor Kim Reynolds executed the state's agriculture and natural resources bill, which included a water quality package known as "**Farm to Faucet.**"

BE IT ENACTED BY THE GENERAL ASSEMBLY OF IOWA AMERICAN LEGION BOYS STATE THAT: The DNR is hereby authorized to adopt standards defining excess emissions of nitrates into or reaching Iowa's water system that are sourced from Iowa's "Factory Farms." The DNR will adopt and impose fines corresponding to the level and/or duration of such excess emissions. All funds collected will be used to expand the infrastructure needed to remove nitrates from Iowa's water system.
